

**DUSO Mathematics League 2015 - 2016**

Contest #2.

Calculators are not permitted on this contest.

**Part I.**

**ALGEBRA I**

*Time Limit: 10 minutes*

*The word “compute” calls for an exact answer in simplest form.*

**2 - 1.** Compute the number of ordered pairs of positive integers  $(x, y)$  that satisfy  $y \leq 16 - 4x$ .

**2 - 2.** Compute the whole number  $N$  such that  $N^6 = 6,321,363,049$ .

---

**DUSO Mathematics League 2015 - 2016**

Contest #2.

Calculators are not permitted on this contest.

**Part II.**

**GEOMETRY**

*Time Limit: 10 minutes*

*The word “compute” calls for an exact answer in simplest form.*

**2 - 3.** A square has three vertices at  $(7, 1)$ ,  $(3, 4)$ , and  $(6, 8)$ . Compute the coordinates of the fourth vertex.

**2 - 4.** The square base of a pyramid has perimeter 24 cm. The volume of the pyramid is 60 cubic centimeters. Each of the four isosceles triangular sides of the pyramid has a height of  $H$  cm. Compute  $H$ .

---

**DUSO Mathematics League 2015 - 2016**

Contest #2.

Calculators are not permitted on this contest.

**Part III.**

**ALGEBRA II / ADVANCED TOPICS**

*Time Limit: 10 minutes*

*The word “compute” calls for an exact answer in simplest form.*

**2 - 5.** On Monday, two students in a class were randomly sent to the board to do a problem. On Tuesday, there were four students absent; again, two students were sent to the board to do a problem. If there were 102 fewer ways to send the students to the board on Tuesday than on Monday, compute the number of students in the class.

**2 - 6.** Compute the value of  $(\sqrt{3} - i)^4 + (\sqrt{3} + i)^4$ . Recall that  $i = \sqrt{-1}$ .

DUSO Mathematics League 2015 - 2016

Contest #2.

TEAM ROUND

Calculators are not permitted on this contest.

**T-1.** Sammy and Tammy go out for a one-hour jog. Sammy alternates between running for 5 minutes at 6 miles per hour and then walking for 1 minute at 2 miles per hour. Tammy runs at a constant pace of  $M$  miles per hour. Sammy and Tammy finish their jog at the same time. Compute  $M$ .

**T-2.** Compute the value of the greatest integer  $N$  such that  $7^N$  divides  $2015!$ .

**T-3.** Let  $f(x) = x^3 - 6x^2 + 8x - 5$ . If  $f(x)$  can also be expressed  $f(x) = (x - 2)^3 + b(x - 2)^2 + c(x - 2) + d$ , compute the ordered triple  $(b, c, d)$ .
