

# Anne and Gilbert the Water Molecules

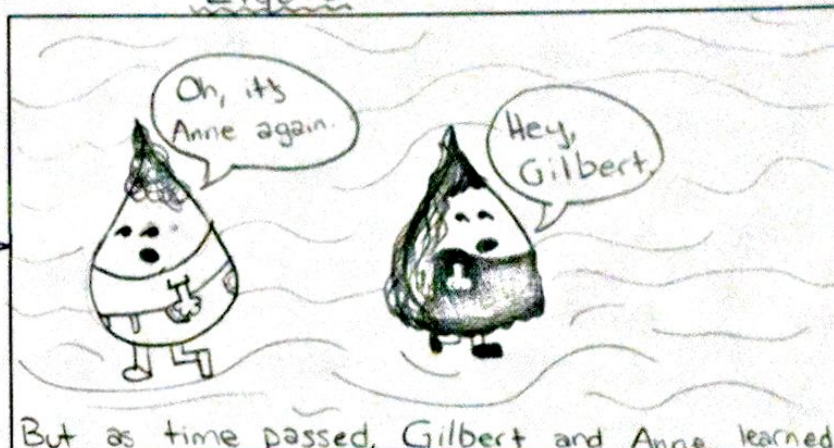

Gas

Anne and Gilbert were childhood enemies. They would run away very fast whenever they got near each other. They stayed pretty far away from each other.

Heat is taken away  
(Gilbert and Anne grow older...)

Liquid

But as time passed, Gilbert and Anne learned to tolerate each other, and when they saw each other they would just look away and walk the opposite direction. They were growing closer.

Solid

Pretty soon, Gilbert and Anne had struck a special relationship - that of man and wife. They hardly moved apart from each other at all. They were totally tight. "And they lived happily ever after..."

More heat is taken away (More time passes)
